

the fact that the *Journal of the American Medical Association* (JAMA) has been the most widely cited journal in the field of medicine for over 50 years (Roberts, 1999).

There are a number of reasons why the JAMA has been so successful. First, it has a long history of publishing high-quality research. Second, it has a strong reputation for being a leading journal in the field of medicine. Third, it has a wide range of content, covering a broad spectrum of medical topics. Fourth, it has a strong focus on clinical research, which is the most important type of research for many physicians. Finally, it has a strong commitment to the public good, which has helped it to build a strong reputation for being a leading journal in the field of medicine.
